Bella, made by Metanoia Films, won the People’s Choice Award at the Toronto International Film Festival (the most influential festival in the World). Bella also received awards from the Smithsonian and the White House for its positive contributions to the Arts and Culture. Most importantly, Bella is a beautiful story that celebrates “LIFE” and the hidden treasures that are too often taken for granted. The characters in the film portray poignant realism in “true to life” circumstances, when faced with the options of giving or taking Life.
